SUMMARY

Motivated B.Tech student specializing in Artificial Intelligence and Data Science, graduating in 2027, with hands-on experience in software development, full-stack web development, backend APIs, databases, and machine learning applications. Skilled in Python, JavaScript, React.js, Node.js, Express.js, MongoDB, SQL, FastAPI, REST APIs, Git, and GitHub. Built end-to-end web and AI applications involving frontend development, backend integration, database connectivity, API consumption, and deep learning. Seeking opportunities to contribute strong problem-solving, programming, and software development skills as a Software Developer or Technology Intern.

EDUCATION

Fabtech Technical Campus

Bachelor of Technology — Artificial Intelligence & Data Science, Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Machine Learning, Artificial Intelligence, Web Development Expected Graduation: 2027

PROJECTS

MedVision-AI — AI-Assisted Chest X-Ray Analysis | Python | PyTorch | FastAPI | JavaScript | ResNet18 | Grad-CAM

- Developed an end-to-end AI-powered web application to classify chest X-ray images as NORMAL or PNEUMONIA.
- Implemented a ResNet18 deep learning model with a custom classification layer for binary image classification.
- Built a FastAPI backend for image uploads, model inference, predictions, and confidence scores.
- Implemented Grad-CAM explainability to visualize regions influencing model predictions.
- Developed a web interface for image upload, analysis, prediction results, confidence display, and visualization.
- Integrated frontend and backend through REST APIs and debugged CORS, file upload, API, and model inference issues.

Movies App — Movie Discovery Web Application | React.js | JavaScript | HTML | CSS | REST API

- Developed a responsive movie discovery web application using React.js and JavaScript.
- Integrated a movie REST API to retrieve and display dynamic movie information.
- Implemented search and interactive browsing functionality.
- Built reusable React components and managed dynamic application state.
- Designed responsive user interfaces and resolved frontend and API integration issues.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), SQL

Web Technologies: React.js, Node.js, Express.js, HTML5, CSS3

Backend & APIs: FastAPI, REST APIs, API Integration

Databases: MongoDB, Mongoose, SQL

AI & Machine Learning: Machine Learning, Deep Learning, PyTorch, CNN, ResNet18, Computer Vision, Grad-CAM

Developer Tools: Git, GitHub, VS Code, Postman

Core Concepts: Data Structures & Algorithms, OOP, DBMS, CRUD Operations, Database Design, Debugging, Problem Solving

ADDITIONAL DEVELOPMENT EXPERIENCE

- Practicing Data Structures and Algorithms using Python. - Building hands-on projects involving web development, REST APIs, databases, and machine learning. - Familiar with version control and collaborative development workflows using Git and GitHub. - Strong interest in software engineering, full-stack development, backend systems, and artificial intelligence.
