CAREER OBJECTIVE

Final-year B.Tech (Artificial Intelligence & Data Science, 2027) student seeking a Python Developer role. Strong Python skills with hands-on experience building backend REST APIs (FastAPI, Flask), working with SQL and NoSQL databases (MySQL, MongoDB), and developing and deploying machine learning models (PyTorch, ResNet18, Grad-CAM). Experienced with Git/GitHub, API integration, debugging, and documentation, and able to collaborate with cross-functional teams to deliver clean, working software.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, JavaScript, HTML, CSS
- **Backend & APIs:** Python, Flask, FastAPI, REST API Development, API Integration, JSON Data Handling
- **Databases:** SQL and NoSQL Databases, MySQL, MongoDB, MongoDB Atlas, Database Design & Queries
- **AI & Data Libraries:** PyTorch, Machine Learning, Deep Learning, Computer Vision, ResNet18, Pandas, NumPy, Matplotlib, Model Training & Evaluation
- **Frontend:** React.js, HTML, CSS, JavaScript
- **Tools & Practices:** Git, GitHub, VS Code, Postman, Debugging, Software Development Lifecycle, Technical Documentation, Collaboration

EDUCATION

B.Tech — Artificial Intelligence & Data Science | Fabtech Technical Campus, Sangola (DBATU) | Expected 2027 | CGPA: 8.0
12th (HSC) | L.S.V.D Vidyalaya & Late Annasaheb Ghule (Sarkar) Jr. College, Maharashtra State Board | 2023 | 63.33%
10th (SSC) | Javahar Vidyalaya Gherdi, Maharashtra State Board | 2021 | 76.88%

RELEVANT PROJECTS

MedVision-AI — AI-Assisted Chest X-Ray Analysis | Python, PyTorch, FastAPI, ResNet18, Grad-CAM
- Developed a Python backend with FastAPI that serves a trained ResNet18 deep-learning model through a REST API, classifying chest X-rays as NORMAL or PNEUMONIA.
- Implemented Grad-CAM heatmaps to explain model predictions and returned confidence scores via structured JSON responses.

SkillAI — Skill-Gap Analysis Platform | React, FastAPI, MongoDB, REST API
- Built a full-stack platform that compares user skills against career requirements and generates personalized learning roadmaps.
- Developed REST APIs in Python with FastAPI, integrated MongoDB Atlas for data storage, and built React dashboards with persistent roadmap progress tracking.

MediVerify AI — Doctor Verification & Recommendation System | Python, Flask, MySQL, HTML, CSS, JavaScript, QR Code
- Implemented credential-matching logic in Python (Flask) over MySQL records with 3 structured outcomes: Verified, Unable to Verify, and Data Needs Update.
- Integrated QR-code-based access to verification records and built an admin dashboard to manage doctors, verification records, and logs.
- Enabled users to discover doctors by specialization and location using a MySQL-backed search interface.

Movies App — Movie Discovery Web Application | React.js, JavaScript, HTML, CSS, REST API
- Built a responsive single-page application consuming a third-party REST API, with search and reusable, state-driven React components.

ADDITIONAL STRENGTHS

- Strong problem-solving and debugging skills with attention to code quality and detail
- Quick learner, adaptable to new technologies and frameworks in Python, AI, and machine learning
- Effective team collaboration, clear communication, and documentation of code and experiments
